

Swinton Street Orienteering

Before you set out around the streets of Swinton, here are some handy hints and tips about how it works and what to expect.

Keeping Safe

This event is a score event therefore you'll need to plan your own route as you go. Care has been taken to avoid dangerous areas, but you are ultimately responsible for your own safety whilst out on the course.

You must:

- **Wear high visibility clothing,**
- Use a head torch,
- Take care when crossing all roads. Only cross the East Lancashire road dual carriageway at mandatory crossing points,
- Bring a pen or pencil,
- Give way to other pedestrians,
- Do Not cross out of bounds areas or enter private properties.

Scoring

Controls will be items of street furniture from which you will record an answer on your separate answer sheet. Each control will have a points value from 20 to 70, which is the first digit of the control number multiplied by 10. What you are looking for is further down.

Penalties will be 1 point for every 3 seconds. 20 points per minute.

Run Time

You can choose on entry to run either 60 or 75 minutes. There will be results for each time group plus a combined results table worked out at points per minute.

SI dibbers will be used to record start and finish time, these can be hired as part of the entry process.

Start Procedure

Please only arrive at the start area near the cenotaph within your chosen start window. This is to ensure social distancing is maintained and the start area doesn't become over crowded.

Once at the start area:

- Line up as per the markers set out at 2m intervals,
- Use hand sanitizer before you collect your answer sheet,
- Clear and check your dibber whilst waiting to start, hired dibbers will be distributed at the start area,
- Dib the start box and pick up your map from the map box,
- Everyone will be started at one-minute intervals.

Finish Procedure

When you've completed your run, return to the cenotaph and dib the finish box. Once you've recovered, move to the download area to obtain your timing print out. Your printout will be stapled to your answer sheet and placed in a box.

Please also return any hired dibbers at this point.

Once your time has been recorded and any dibber handed in, please move away from the start/ finish area.

Results

These will be published on the SELOC website in due course.

What are you looking for? Around the streets, the following street furniture has been used for this event;

Post Boxes – Numbers/ Letters within the postcode.

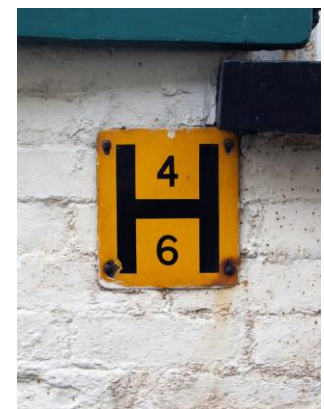

Telegraph Poles – Numbers/ Letters usually high up.

Green Boxes – the number will be on the end or the side.

Substation No. This number will appear on the white sign, usually on the door or gate.

Fire Hydrant Sign or H on – the number you need will be the lower number.

Lamp Post – The number will usually be halfway up.

At this event you may also need to find:

- A business telephone number.
- The name of a block of flats.
- A number on a carved stone.
