Organiser/planner comments

Thank you to all for coming to make a good turn-out on a rather different evening weather-wise than last week's heat. The rain mostly kept off for the early starters but later ones got a short soaking and Dan wisely curtailed his run after being caught in the thunderstorm. I hope you enjoyed a return to an event with indoor facilities but also with plenty of space to maintain social distancing; thanks to Radcliffe Boro FC for hosting us.

Apologies to those who took the 'track' route rather than the road to #44. A section of this route had been underwater when I first started planning but upon my final check run, it was almost completely dry and I totally forgot about it as a hazard! Well done to those who persevered through the 'large puddle'. There was another unexpected hazard which was perhaps less predictable - geese with goslings in the park.

There were only 2 controls that no-one visited, #20 and #27. I was pleased to see that the 2 canal bridges, #59 and #69, came into play and I assume the one person who scored both of these chose the towpath option between them.

Queries and incorrect answers

I've been generous with marking those answers where the legibility was less than perfect.

There was one query that #68 was 'not there' but lots of people found it.

A couple of people doubled up the expected answers for 'number of bollards'. I've allowed these on the basis that I expected the number at the dot in the centre of the control circle but there were the same number of bollards at the other end of a segment of track that were also just about in the circle.

Telegraph poles: One person gave a wrong answer for #33 while most were correct. Likewise, two people gave a wrong answer for #46. One person gave a wrong answer for #41 and a check on Google maps suggests they were at the TP on the parallel street.
